SUMMARY

AI & Cybersecurity enthusiast with strong hands-on experience in ethical hacking, penetration testing, and AI-based security systems. Completed 100+ labs across real-world attack and defense scenarios including Active Directory exploitation, malware analysis, and SOC operations. Passionate about building intelligent security solutions using AI and automation.

EDUCATION

Nagarjuna College of Engineering and Technology

Bachelor of Engineering (AI & ML)

Bangalore, India

2023 – 2027

CN Raju Junior College

Intermediate (MPC)

– Percentage: 57.8%

Rayachoti, India

2021 – 2023

Sri Vijetha High School

Board of Secondary Education

– Percentage: 92%

Tirupati, India

2020 – 2021

PROJECTS

AI Log Defender

- Developed an AI-powered system to monitor logs and detect anomalies in real-time.
- Implemented intelligent alerting system for suspicious activities.

TrustGuard AI (Fraud Detection System)

- Built a multi-layer fraud detection system using AI.
- Implemented behavioral analysis, anomaly detection, and risk scoring.

Vulnerability Scanner

- Created a web vulnerability scanner to detect XSS and SQL Injection.
- Used for penetration testing and security audits.

Security Assistant

- Developed an AI-based assistant for cybersecurity queries.
- Provided security insights and mitigation techniques.

Deepfake Detection System

- Built an AI model to detect deepfake videos.
- Focused on identifying manipulated media using machine learning.

AI Sports Strategy Analyzer

- Used OpenCV and AI to analyze match videos.
- Extracted insights to improve gameplay strategy.

SKILLS

Languages: Python, JavaScript, HTML, CSS

Cybersecurity: Ethical Hacking, Penetration Testing, SOC Analysis, Malware Analysis, Digital Forensics

AI/ML: Machine Learning, OpenCV, NLP, Deep Learning Basics

Tools: Git, Linux, Networking, WebSockets

CERTIFICATIONS

- Red Teaming Certificate – TryHackMe
- IBM SkillsBuild Cybersecurity Certificate
- Deloitte Cyber Job Simulation – Forage
- Google Cloud Cybersecurity Certificate
- ISC2 Candidate
- Cisco Ethical Hacker

- Cisco Introduction to Cybersecurity
- Google Play Academy Certification

EXPERIENCE

Completed 100+ hands-on labs across Easy, Medium, and Hard difficulty levels.

Domains: Active Directory Exploitation, Phishing, Malware Analysis, AV Evasion, LOLBins, C2 Detection, Digital Forensics, SOC Triage

Key Labs: Internal Pentesting, Windows Privilege Escalation, Red Team Recon, Exploiting Active Directory, Malware Analysis, SOC Alert Triage
